ALPHABETICAL

AUTHOR, TITLE AND SUBJECT

SECTION

When you wish to know what books are available on a subject or by an author consult this index first

ALPHABETICAL AUTHOR, TITLE AND SUBJECT SECTION

This Section contains entries or reference entries under authors, titles, editors, translators, series and subjects in one alphabetical sequence.

The entry under the author gives, in an abbreviated form, most of the information to be found in the entry in the Classified Subject Section. If a fuller description is required, the entry in the Classified Subject Section can be found by means of the decimal code number at the end of the author entry.

If the editor, translator, title or series only is known, it will be necessary to refer back to the entry in this Section under the author's name. For example if you look up the title *About food values* you will find the entry:

About food values. *See* Davis, Barbara.

To find details of this book and its decimal code number, it is necessary to refer to the entry in this index under

Davis, Barbara. About food values. *Thorsons*, 3/6. 612.39 (B60-3130)

If you wish to know what books have been published on a particular subject consult this Section under the name of the subject. Here again you will find a decimal code number which must be sought in the Classified Subject Section.

It will be found most convenient to look up the specific name of the subject, for this will refer you directly to the decimal code number under which books on that subject are to be found. However, if you look up another word concerned with the subject you will find that the decimal code number for this word will refer you to a part of the Classified Subject Section so close to the subject you require that the eye will be quickly led to it by the captions and "feature words" appearing against the numbers.

Even though you may be familiar with the arrangement of the Classified Subject Section, it is always advisable to consult this index first.

An explanation of the abbreviations used in describing books in the Bibliography and further details for tracing information are given in the Preface.
